Paul Curnow

- Acted for NEOEN Australia, a developer, financier, builder and operator of large-scale green power plants, solar farms, wind farms and biomass units, on the acquisition of Hornsdale Wind Farm from Investec. Hornsdale Wind Farm, located in South Australia, will consist of approximately 100 wind turbines.
- Acted for NEOEN Australia on debt financing for the 100MW first stage of its Hornsdale Wind Farm project near Jamestown in South Australia. The deal is the first of the large-scale wind projects in Australia under the recent ACT 200MW Wind Auction and it is one of the only renewables projects in Australia to benefit from long-term 10+ year debt financing.
- Acted for NEOEN Australia in the acquisition and debt financing of the DeGrussa Solar Farm - a 10.6 MW solar PV project that will be integrated into the existing diesel generator facility to power the DeGrussa Copper Mine in remote Western Australia. This is Australia's largest solar and battery storage project to date.
- Advised Malakoff Corporation Berhad (Malaysia) on its acquisition and refinancing of a 50 percent interest in the A\$1.2 billion Macarthur wind farm in Victoria from Meridian Energy.
- Advised the Electricity Generating Public Company Limited (EGCO group), on their acquisition of 100 percent of the shares in Boco Rock Wind Farm Pty Ltd from Asia Pacific Renewables Pty Ltd and GE, including the financing and construction of the wind farm.
- Consoled SunEdison on the securitisation structuring and financing of their Australian solar rooftop PV business.
- Advised Eurus Energy on its acquisition and financing of the 52MW Hallett 5 Wind Farm, which was acquired from AGL Energy. The deal included the negotiation of long-term asset management and off-take contracts under which AGL will continue to operate and manage the wind farm and take the benefit of the electricity and green rights output.
- Advised Fotowatio Renewable Ventures on their consortium bid with BP Solar for the development of a large-scale solar PV power plant under the Australian government's Solar Flagship program.
- Advised Ratchaburi on its acquisition of a portfolio of operating wind farms and wind farm development sites across Queensland, New South Wales and Victoria.
- Advised NSW Treasury on its privatisation of New South Wales electricity retail businesses and certain generation trading rights.

- Assisted Union Fenosa in the development of its A\$2.4 billion Australian wind farm portfolio.
- Advised Zhenfa Solar on its investment in the Mugga Lane 13MW solar farm.
- Drafted a term sheet and advised Embark on its contractual negotiations with Capella Capital and Lend Lease.
- Assisted Australia Solar Thermal Energy Industry Association in its establishment and ongoing operation.
- Counseled Asia Energy Access Fund on fund structuring and capital raising for the establishment of specialist finance companies in Asia to provide project and working capital debt finance for smaller scale renewable energy developers.
- Advised Elementa Group on project structuring and development of steam reformation waste-to-energy projects in Singapore and the Philippines.
- Assisted Biogen Limited in its fundraising activities and the development and financing of proposed biomass electricity generators.
- Advised Trading Emissions PLC on project structuring and offtake arrangements for small hydro-electric projects in Chile and Peru.
- Advised Korea Electricity Power Corporation (KEPCO) and Samsung C&T on their bid (with Ergon Energy) for the development of a smart grid demonstration project under the Smart Grid Smart City programme.
