BIOLOGICAL TECHNOLOGIES

WHAT WE DO

Portfolio Management

We prosecute, manage and advise on patent portfolios and strategy, including utility patents, design patents, and utility models

Transactions

We advise and lead patent assignments and licensing, acquisitions and disposals, due diligence and audits

Strategic Advice

We advise on complex patent questions across the full range of technical specializations, including issuing opinions on patentability, validity, freedom to operate, and infringement risks

Patent Mapping

We analyze relevant competitive patent landscape and advise on consequential patent strategy

WHY WE ARE DIFFERENT

Track Record

We have a track record of global patent prosecution, helping our clients identify key jurisdictions and key products and features, to ensure robust yet cost-effective global patent protection

Quality

Our patent lawyers and agents hold undergraduate and advanced technical degrees, giving you technical depth and breadth

Efficiency & Pricing

We offer practical pricing models backed up by economies of scale, which allows us to deliver global services at locally competitive prices

Innovative

We offer a unique platform for more efficient patent records called Pat-Rec, coupled with our sophisticated and secure online docketing system, helping you stay up-to-date across all areas of patent management

PATENT PROSECUTION PRACTICES ACROSS THE US, LATAM, EMEA AND APAC
LOCALLY RANKED IP PRACTICE IN 95% OF OUR MARKETS
LONG EXPERIENCE PROSECUTING PATENTS FOR SOME OF THE MOST INNOVATIVE
COMPANIES AROUND THE WORLD

"Baker & McKenzie's trademark division may make most of the headlines, but patent owners are consistently delighted by the service on offer at this innovative firm. The global titan achieves the rare distinction of having practitioners ranked in three continents – South America, Asia and Europe, where the Moscow contingent continue to knock it out of the park on a range of hard IP briefs. Whatever the legal regime, companies can rest assured that their instructions will be handled in a way that maximises the value of their crown-jewel assets." —*IAM PATENT 1000 SURVEY*

"They do a good job of cultivating some really good people, and we're able to reap the benefits of that. We wouldn't be using them all over the place if that weren't true!" —*CLIENT QUOTE, CHAMBERS*
