We have a strong track record of working successfully with global companies to structure and implement complex cross-border reorganizations and restructurings.

In fact, we are one of only a handful of law or accounting firms with a global practice devoted to providing sound and commercial advice for domestic and multijurisdictional solvent reorganizations.

Whether driven by customer demand, regulatory or tax issues, or related to transactional activity, we take into account our clients’ commercial objectives and needs while facilitating compliance with local laws, tax requirements, and business and cultural practices. And by strategically addressing all legal implications, we help our clients manage change more effectively and deliver better value with less business risk.

Reflecting the nature of the multi-faceted advice required, our Global Reorganizations Group comprises experienced practitioners principally from our global corporate, employment and tax practices.

Coordinating closely with our industry specialists, we bring in the right expertise and far-reaching experience to anticipate and resolve all regulatory and other industry-specific issues.

The experience gained by the team in working together on a day-to-day basis gives us the unique ability to combine practical advice on local requirements with implementation strategies and solutions at the local, regional and global levels.

We utilize an extensive global precedent and know-how base, including checklists, step lists and other project management tools, to ensure that all the right issues are covered, the right steps are taken — in the right sequence and at the right time — and the project is completed efficiently and by all deadlines, however tight.

Here are areas where we can help:
- Packaging businesses prior to an IPO, spin-off or disposal;
- Post-acquisition integrations of acquired groups of companies;
- Supply chain restructurings;
- Holding company structures;
- Restructuring a group’s arrangements for the ownership, development and exploitation of intellectual property;
- Recapitalization or refinancing-related restructurings;
● Redomiciliations and other reorganizations designed to reduce a group’s worldwide effective tax rate;
● Accessing cash locked up in overseas subsidiaries; and
● Corporate clean-ups and group simplifications.

Representative Deals
